DETAILED ACTION

1. Applicant has amended claims 1 and 9 in the amendment filed on 10/21/2008.

Claims 1-16 are pending in this Office Action.

Response to Arguments

2. Applicant's arguments with respect to claims 1-16 have been considered but are moot in view of the new ground(s) of rejection.

Applicant's argument on pages 5-7, the 103 rejection for claims 1-16 and the 112 rejection for claims 1-16 are withdrawn.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claims 9-16 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

The limitation "a memory" in claim 9, line 5 was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor.

Claims 10-16 are rejected under the same reason as discussed in claim 9.

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 1 recites the limitation "the respective automation objects" in lines 7-13 and the limitation "the respective object names" in line 6. There is insufficient antecedent basis for these limitations in the claim.

Claim 9 recites the limitation "the respective automation objects" in lines 7-13 on page 3 and line 1-2 page 4. There is insufficient antecedent basis for this limitation in the claim.

Claims 2 and 10 recite the limitation "the respective automation objects" in lines 2-3. There is insufficient antecedent basis for this limitation in the claim.

The dependent claims 2-8, 10-16 are rejected under same reason as discussed in claims 1 and 9.

Specification

6. The specification is objected to because the term "memory" in claim 9 is not defined in the specification. Appropriate correction is required.

Claim Rejections - 35 USC § 101

7. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

7. Claims 1-8 are rejected under 35 U.S.C. 101 because claims 1-8 contain no hardware. Thus, the claims 1-8 lack the necessary physical articles or objects to constitute a machine or a manufacture within the meaning of 35 USC 101. They are clearly not a series of steps or acts to be a process nor are they a combination of chemical compounds to be a composition of matter. As such, they fail to fall within a statutory category. They are, at best, functional descriptive material *per se*.

Allowable Subject Matter

8. Claims 1-16 are allowed if claims 1-8 get over 101 rejection and 112 rejection and claims 9-16 get over 112 rejections.
